SUMMARY

Full-Stack Engineer with 5+ years of production experience, now focused on building LLM-powered applications. I've shipped customer-facing AI features in production at KNG, written and open-sourced an Anthropic MCP server, and run an active blog on RAG patterns, AI agents, and AI-assisted development. I integrate LLMs into real products end-to-end – from API call to React UI – rather than training foundation models.

AI / LLM SKILLS

LLM providers	Anthropic (Claude), OpenAI, Google (Gemini), Groq (Llama) – direct API integration, streaming, tool use
Production patterns	AI agents with tool use, MCP servers, prompt design, in-app AI features
AI tooling	Anthropic Model Context Protocol (built and shipped a server), Vercel AI SDK, Trafilatura for web extraction
AI-assisted dev	Claude Code, Cursor, Cline – shipped 20+ side projects using AI-pair-programming workflows
Researching / writing	RAG architectures, fine-tuning patterns, agent orchestration – documented on jagyeman.dev/blog, not yet built in production
Adjacent	Python, FastAPI, Next.js – the stack you actually deploy LLM apps on

ENGINEERING SKILLS

Languages	Python, TypeScript, JavaScript, Go
Backend	Django, Django REST, FastAPI, NestJS, Express
Frontend	React, Next.js, TypeScript, Tailwind
Data & infra	PostgreSQL, MySQL, Redis, Elasticsearch, Kafka, Docker, Kubernetes, AWS
CI/CD	GitHub Actions, GitLab CI, CircleCI

SELECTED AI PROJECTS

- **TLDR & TLDR Web** – AI-powered article summarizer (CLI + web). Fetches webpages with Trafilatura, summarizes via Groq-hosted Llama, supports streaming responses, multi-language translation, and Q&A mode. Python / Click / Rich for the CLI; Next.js 15 + Vercel AI SDK for the web. tldr-pi.vercel.app – github.com/TRINITY-21/tldr
- **MCP Server for Paystack** – Model Context Protocol server exposing Paystack's payment API as tools an AI agent can call. Python. github.com/TRINITY-21/mcp-server-paystack
- **dotruler** – One config, every AI coding tool, always in sync. Generates `CLAUDE.md`, `.cursorrules`, `copilot-instructions` from a single source. Python, Textual, Rich, on PyPI. github.com/TRINITY-21/dotruler
- **Roamly** – AI-powered travel planner that generates personalized itineraries and destination recommendations. React, Vite, Tailwind. travel-planner-pi-eight.vercel.app

SELECTED WRITING

- Building RAG Applications: From Naive Search to Production Pipeline – chunking, embeddings, vector DBs, re-ranking, and the pitfalls tutorials skip.
- The Rise of AI Agents: Building Autonomous Systems That Actually Work – ReAct loops to multi-agent orchestration.
- Fine-Tuning LLMs: When You Need It and How to Do It Right – when fine-tuning beats prompting, LoRA vs full, evaluation strategy.

- AI-Assisted Development: How I Actually Use AI to Write Better Code.

ENGINEERING EXPERIENCE

KNG Technologies

September 2022 – Present

AI Application Engineer

Remote

- Build production features in Django and Next.js / TypeScript on a platform with a Kafka-backed event pipeline.
- Ship services on AWS / Kubernetes via GitHub Actions; design REST contracts and pytest test suites.
- **Built and integrated a customer-facing AI assistant** into a KNG product handling [N] users – owned the LLM provider integration, prompt design, and the React UI users interact with.
- **Shipped an AI-powered workflow feature inside Artist Desk** – a project-management platform for musicians and artists – which now supports [N]+ active creators on the AI-assisted flow.
- AI work outside the day-job: built and open-sourced an MCP server, shipped 20+ AI-assisted side projects (Groq, Claude, OpenAI integrations), wrote 14+ technical posts on AI engineering at jagyeman.dev/blog.

Cyboticx

October 2021 – June 2023

Full-Stack Developer (Contract)

Remote

- Built TypeScript / Django product features with Elasticsearch search, Redis caching, and CircleCI deploys to Kubernetes.

Credmap

September 2020 – June 2022

Backend Engineer

Accra, Ghana

- Django REST APIs for *Panabios* and *Alkemy Care*, B2B platforms in Ghana's pharma / health space, with RabbitMQ async processing.

EDUCATION

Sakarya University

2023 – 2025

M.Sc., Software Engineering

Sakarya, Turkey

Thesis: STACAD — Detecting and Attributing LLM-Generated Code through Stylometric and Transformation Feature Analysis (directly relevant to this role).

University of Energy and Natural Resources

Graduated 2021

B.Sc., Computer Engineering

Sunyani, Ghana

LANGUAGES

English (fluent) | Turkish (working)
