SUMMARY

Software Engineer with backend foundations in Python / Django, recently working full-stack with frontend lean. Comfortable designing REST APIs, working with PostgreSQL and Redis, writing tests against domain logic, and shipping services in containerized environments. Looking for backend-focused roles where I can rebuild depth on real production traffic.

SKILLS

Languages	Python (primary), JavaScript / TypeScript, Go (side projects)
Backend frameworks	Django, Django REST Framework, FastAPI, NestJS, Express
Databases	PostgreSQL, MySQL, MongoDB, Redis
Search	Elasticsearch
Messaging & events	Kafka, RabbitMQ
Caching	Redis
Containers & cloud	Docker, Kubernetes, AWS (working knowledge)
CI/CD	GitHub Actions, GitLab CI, CircleCI
Testing	pytest, Django test client, Jest
Workflow	Agile / Scrum, code review, REST API design, OOP, TDD where it earns its keep

EXPERIENCE

KNG Technologies	September 2022 – Present
<i>Backend Engineer</i>	<i>Remote</i>

- Contributed to a Django REST workflow service: designed [N] endpoints, built ORM-backed data models, and integrated with a Kafka event pipeline.
- Wrote pytest unit tests covering domain logic and API behavior; coverage held above [N]% on the modules I owned.
- Worked alongside DevOps to ship Django services on AWS / Kubernetes via GitHub Actions, including container builds and Helm-based deploys.
- Used PostgreSQL for primary persistence; tuned queries on hot endpoints, cutting p95 latency by [N]% on [endpoint name].

Cyboticx	October 2021 – June 2023
<i>Full-Stack Developer (Contract)</i>	<i>Remote</i>

- Built and maintained Django REST APIs backed by MySQL for a TypeScript / Django product.
- Added Redis caching to reduce repeat-query load on hot endpoints.
- Worked with Elasticsearch as the search backend, including index design and query construction.
- Supported CircleCI pipelines and Kubernetes-based deploys for backend services.

Credmap	September 2020 – June 2022
<i>Backend Engineer</i>	<i>Accra, Ghana</i>

- Developed Django backends and REST APIs for *Panabios* and *Alkemy Care*, B2B platforms in Ghana's pharmaceutical and health space serving [N] business users.
- Used RabbitMQ for asynchronous task processing and decoupling slow operations from request paths – handling [N]K jobs per day.
- Managed deployments to Linode infrastructure with Ansible; maintained and contributed to shared internal Python packages.

- Active in sprint meetings and code review; spent real time reading other people's backend code, not just writing my own.

SELECTED PROJECTS

- **FamConnections** – Family networking platform with tree-building, media hub, and Google Maps integration. Django backend with a Next.js / React frontend. famconnections.com
- **AfCFTA** – Blogging and debate platform for the African Continental Free Trade Area. Django + PostgreSQL + Docker, REST API consumed by a Vue frontend. afcfta.blog
- **Cryptospace Network** – Multi-service crypto platform: card services, fiat-to-crypto, NFT marketplace. React frontend on a Django / PostgreSQL REST API. cryptospace.com
- **Briefkit API** – Aggregator REST API (weather, crypto, news) with API-key auth, rate limiting, TTL caching, and auto-generated Swagger docs. FastAPI, SQLAlchemy, httpx, Pydantic. github.com/TRINITY-21/briefkit
- **Zap** – Open-source PyPI package wrapping Python's `subprocess` with pipe chaining, live streaming, retries, and async support. pypi.org/project/zap-sh

SELECTED WRITING

- Building Scalable APIs with Django REST Framework
- From Monolith to Microservices: Lessons Learned
- System Design Fundamentals Every Developer Should Know

EDUCATION

Sakarya University	2023 – 2025
<i>M.Sc., Software Engineering</i>	<i>Sakarya, Turkey</i>
<i>Thesis: STACAD — Detecting and Attributing LLM-Generated Code through Stylometric and Transformation Feature Analysis</i>	
University of Energy and Natural Resources	Graduated 2021
<i>B.Sc., Computer Engineering</i>	<i>Sunyani, Ghana</i>

LANGUAGES

English (fluent) | Turkish (working)
